Service Hours

Monday - Friday 8:00am - 5:00pm
Saturday 9:00am - 12:00pm

SUPREME OIL SERVICE

This service is accompanied with an oil change. The engine is chemically cleaned using a gentle detergent. This removes harmful sludge and varnish deposits with old oil when drained. A chemical treatment is added to give extra protection to the engine.

FUEL SYSTEM SERVICE

This service completely cleans the entire gasoline fuel system by chemically cleaning valves, injectors, combustion chamber, fuel lines, and throttle plate. Restores the fuel system to 'like new' operation for Maximum Performance.

BRAKE FLUID SERVICE

This service consists of flushing out all old contaminated brake fluid from the entire system, simultaneously replacing it with Wynn's HD Brake Fluid to ensure proper brake system operation.

BRAKE SERVICE

Brake pads are a critical part of your braking system. Pads are designed to wear with use and the rate of wear depends on usage and loads. Constant exposure to the elements may result in rust build-up, which can cause brake dragging, pulling, pulsating and/or abnormal noise. Regular lubrication and cleaning of braking system components helps ensure proper function as well as reducing premature wear and noise while braking.

TRANSMISSION SERVICE

This service chemically cleans the entire transmission, changes ALL the old contaminated transmission fluid, and the new fluid is treated to give it maximum protection over the life of the fluid. Helps ensure proper shifting and function.

DRIVELINE SERVICE

This service consists of draining all the old fluid from the Differential & Transfer Case. It is then replaced with fresh Wynn's Synthetic Gear Oil & Wynn's Synthetic Transfer Case Oil with a protection package for better anti-friction and wear.

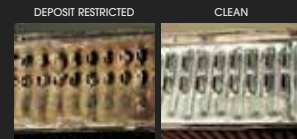

POWER STEERING SERVICE

This service completely cleans the entire gasoline fuel system by chemically cleaning valves, injectors, combustion chamber, fuel lines, and throttle plate. Restores the fuel system to 'like new' operation for Maximum Performance.

COOLING SYSTEM SERVICE

This service consists of flushing out all old contaminated brake fluid from the entire system, simultaneously replacing it with Wynn's HD Brake Fluid to ensure proper brake system operation.

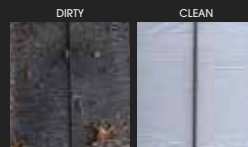

BATTERY SERVICE

Over time corrosion accumulates on the battery posts and terminals to the degree that this build-up begins to drain power from the battery. The Wynn's Battery Maintenance Service will protect your battery from corrosion and failure.

CABIN AIR FILTER SERVICE

Replacing your cabin air filter during your visit will help trap any pollen, bacteria, dust, and exhaust gases from entering your vehicle. Additionally, we also treat your HVAC system with Wynn's Airco-Clean that helps kill any existing mold, bacteria and microorganisms. This leaves your vehicle with a fresh and clean (hypoallergenic) smell resulting in better air quality for you and your passengers.
